

February 2007

Notice for the Test Specification of DVD-RAM Disc

To verify a DVD-RAM disc supporting multiple recording speeds (e.g. 2x/3x/5x-speed DVD-RAM Disc), you will need to copy some of the Forms in order to describe the test result of each recording speed.

For this purpose, you may use the PDF file "Forms_15N_to_19N.pdf" that is included in the ZIP file, if you are going to describe/submit the test results electronically.

For example, you may use the file in the following manner, in case of 2x/3x/5x-speed DVD-RAM Disc:

- 2x-speed results would be described in the primary file, "Forms_N_V23_Feb2007.pdf".
- 3x-speed results would be described in a file, "Forms_15N_to_19N_3x.pdf".
(Only Form 15N and 16N would be filled.)
- 5x-speed results would be described in another file, "Forms_15N_to_19N_5x.pdf".

Note : Form 2N (2/2) contains check list of Forms for Submission.

For details on Form usage, please refer to the Test Specification.

Thank you for your attention.
